

the intelligent sportswear

CEP – the intelligent sportswear

The brand CEP offers maximum quality, function and unique benefits for all athletes with products tailored to their special needs and wishes.

Whether for sports, regeneration, injury prevention or for an extra boost of energy in everyday life – CEP always has the highest quality solution.

This is guaranteed by the unique expertise behind CEP:

CEP is part of medi, the German manufacturer of high-tech medical products and one of the leading companies in the healthcare market.

Backed by medi, CEP not only has access to state-of-the-art development and production standards and methods, but also to medi compression technology and medi's many decades of expertise in the production of compression legwear.

Together with scientists, physicians and athletes across the globe, medi has taken this wealth of knowledge and optimally integrated it in all CEP products to meet the very specific needs of athletes.

The result: CEP is the premium sports brand for all athletes, regardless of their sport and level.

The products
All CEP products feature a perfect combination of quality and function optimally designed for the respective purpose.

QUALITY AND FUNCTION + medi compression

In addition, all products marked with + incorporate compression for additional benefits "on top" of the functional benefits thanks to medi compression technology.

CEP products are designed with a specific purpose in mind and combine a physiologically perfect compression profile to offer athletes maximum quality and function as well as unique advantages like more energy and greater endurance, faster regeneration, joint and muscle stabilization and excellent protection against injuries.

PRODUCT LINES:

PROGRESSIVE+

The Progressive Sports+ Line stands for maximum performance, maximum endurance, and maximum energy thanks to a physiologically perfect compression profile.

Quality and function combined with the unique benefits of medi compression, tailored to the special needs of athletes and their specific sports.

ACTIVE

Like the Progressive+ and Dynamic+ Line, the Active Line stands for the best combination of quality and function for optimal support of movement during sports. However, since the use of compression does not increase the effects in this case, the Active products do not incorporate medi compression technology.

EVERYDAY+

This line is designed for all athletes who, in addition to working out and playing sports, want to experience the quality, function, and unique benefits of CEP products in everyday life. A perfect look and maximum comfort. Energy and lifestyle. 24 hours a day. 7 days a week.

DYNAMIC+

Like the Progressive+ Line, the Dynamic+ Line also stands for more energy, greater endurance and enhanced performance. The difference to the Progressive+ Line is that products from this line focus on the advantages of partial compression, which limits the compressive effect to certain muscle groups and parts of the body.

RECOVERY+

The Recovery+ Line stands for faster activation of muscles before and optimal regeneration after sports.

Products from this line guarantee ultimate comfort in addition to maximum effectiveness thanks to the combination of quality, function and medi compression.

EVERY ATHLETE IS A CEP CUSTOMER!

BECAUSE EVERY ATHLETE WANTS THE HIGHEST QUALITY

- No slipping, no cutting
- No pressure points or blisters thanks to an extra-flat toe seam
- Extreme durability
- Maximum comfort – no matter how long the competition or training session lasts

■ Backed by medi's many decades of expertise as a high-tech manufacturer of compression legwear made in Germany.

BECAUSE EVERY ATHLETE WANTS MAXIMUM FUNCTION

- For maximum support and protection
- Optimum heat and moisture management all year round
- Antibacterial, odor-reducing properties thanks to a perfect dose of silver ions

■ Guaranteed by state-of-the-art, high-performance yarns and the most innovative production methods.

BECAUSE EVERY ATHLETE WILL ALSO LOVE THE UNIQUE BENEFITS OF CEP

- More energy
- Faster regeneration
- Maximum muscle and joint stabilization
- Optimal prevention against injuries, no cramps
- Unmatched comfort in shoes, pleasant sense of motion

■ Guaranteed by the medi compression profile, physiologically optimized for every type of sport.

CEP – UNIQUE EXPERTISE "MADE IN GERMANY"

No matter what sports your customers do. No matter what performance level your customers are at.

CEP – THE QUALITY SPORTS LEGWEAR WITH ADDED BENEFITS FOR YOUR CUSTOMERS

RUN SOCKS 2.0

NEW EDITION

QUALITY CHARACTERISTICS

Filament fiber for extreme durability | Wide top band for a perfect fit | Extra-flat toe seam prevents pressure points | Anatomical design

FUNCTIONAL CHARACTERISTICS

Metatarsus compression zone for arch stabilization | Open-pore mesh structure in the calf | Optimized Achilles tendon protector | The hydrophile finish effectively wicks moisture away from the skin for perfect heat and moisture management | Air channels for ventilation in the foot region

	COLOR	SIZE	ART. NO.

TOM SPÖLER

"You can really feel the effects of CEP socks – especially during the "English weeks" (two games a week), where there is little time for regeneration. My legs simply feel fresher!"

Forward, Beko-BBL Team BBC Bayreuth

SIMON SCHMITZ

"The entire team is convinced of the effects of CEP Compression Socks & Sleeves, which are obvious in training and during the game. What many people don't know, though, is that almost all of us wear the socks during long drives to away games as well."

Guard, Beko-BBL Team BBC Bayreuth

ROBERT RITTGER

"CEP leg compression gives me a noticeably improved feeling, something I would never have expected before. That's why I recommend that every cyclist try CEP during and after cycling."

Mountainbiker, 29er Racing Team

PROGRESSIVE+

CYCLE SOCKS

WOMEN/MEN

QUALITY CHARACTERISTICS

Aerodynamic knitting | Comfortable top band for a perfect stay-put fit |
Anatomical design for a perfect fit | Extra-flat toe seam

FUNCTIONAL CHARACTERISTICS

Instep protector | Achilles tendon protector | Cooling mesh structure in the calf |
Heat and moisture management | Breathable fabric | Antibacterial, odor-reducing silver ions

BENEFITS thanks to the defined compression profile:

- IMPROVED CIRCULATION IN LEGS AND FEET FOR MORE ENERGY, GREATER ENDURANCE AND ENHANCED PERFORMANCE
- INJURY PREVENTION THANKS TO MUSCLE STABILIZATION
- INCREASED COORDINATION THANKS TO PROPRIOCEPTIVE MUSCLE ACTIVATION
- REDUCED MUSCLE VIBRATIONS
